Aufgabe 1.)

Zähle die Punkte auf den Würfeln und addiere.

$$\begin{array}{ccccc} \begin{array}{|c|c|} \hline \bullet & \bullet \\ \hline \bullet & \bullet \\ \hline \end{array} & + & \begin{array}{|c|c|} \hline & \bullet \\ \hline \bullet & \bullet \\ \hline \end{array} & = & \begin{array}{|c|c|} \hline & \\ \hline & \\ \hline \end{array} \\ \\ \begin{array}{|c|c|} \hline & \\ \hline & \\ \hline \end{array} & + & \begin{array}{|c|c|} \hline & \\ \hline & \\ \hline \end{array} & = & \begin{array}{|c|c|} \hline & \\ \hline & \\ \hline \end{array} \end{array}$$

Aufgabe 2.)

Zähle die Punkte auf den Würfeln und addiere.

Lösungen

Aufgabe 1.)

A visual equation using dice faces. The first die shows 4 dots (two in the top-left and top-right corners, two in the bottom-left and bottom-right corners). This is followed by a plus sign, then a second die showing 3 dots (one in the top-right corner, one in the middle-left, and one in the bottom-left). This is followed by an equals sign, and finally a box containing the number 7.

A numerical equation. A box containing the number 4 is followed by a plus sign, then a box containing the number 3. This is followed by an equals sign, and finally a box containing the number 7.

Aufgabe 2.)

A visual equation using dice faces. The first die shows 2 dots (one in the top-right corner and one in the bottom-left corner). This is followed by a plus sign, then a second die showing 6 dots (two in the top-left and top-right corners, two in the middle-left and middle-right, and two in the bottom-left and bottom-right). This is followed by an equals sign, and finally a box containing the number 8.

A numerical equation. A box containing the number 2 is followed by a plus sign, then a box containing the number 6. This is followed by an equals sign, and finally a box containing the number 8.
