Lösungen

Aufgabe 1.)

A visual equation showing three dice faces. The first face has 4 dots (two in the top row, two in the bottom row). The second face has 5 dots (two in the top row, one in the center, two in the bottom row). The third face has 4 dots (two in the top row, two in the bottom row). The faces are separated by plus signs, followed by an equals sign and a box containing the number 13.

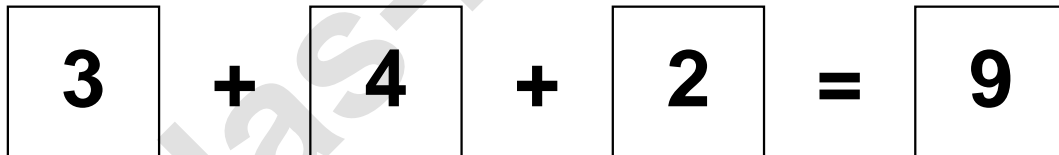

A numerical equation: a box with the number 4, followed by a plus sign, a box with the number 5, followed by a plus sign, a box with the number 4, followed by an equals sign, and a box with the number 13.

Aufgabe 2.)

A visual equation showing three dice faces. The first face has 3 dots (two in the top row, one in the bottom row). The second face has 4 dots (two in the top row, two in the bottom row). The third face has 2 dots (one in the top row, one in the bottom row). The faces are separated by plus signs, followed by an equals sign and a box containing the number 9.

A numerical equation: a box with the number 3, followed by a plus sign, a box with the number 4, followed by a plus sign, a box with the number 2, followed by an equals sign, and a box with the number 9.
