Lösungen

Aufgabe 1.)

A visual equation using dice faces. The first die shows 6 dots (two columns of three), the second shows 3 dots (a diagonal line), and the third shows 4 dots (two pairs of opposite corners). These are followed by a plus sign, another plus sign, and an equals sign, leading to a box containing the number 13.

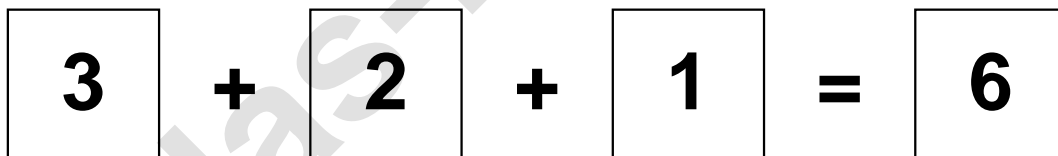

A numerical equation where the numbers 6, 3, and 4 are each inside a square box. These are followed by a plus sign, another plus sign, and an equals sign, leading to a square box containing the number 13.

Aufgabe 2.)

A visual equation using dice faces. The first die shows 3 dots (a diagonal line), the second shows 2 dots (two opposite corners), and the third shows 1 dot (a single center dot). These are followed by a plus sign, another plus sign, and an equals sign, leading to a box containing the number 6.

A numerical equation where the numbers 3, 2, and 1 are each inside a square box. These are followed by a plus sign, another plus sign, and an equals sign, leading to a square box containing the number 6.
