Lösungen

Aufgabe 1.)

A visual equation using dice faces. The first die shows 4 dots (two on the left, two on the right). The second die shows 2 dots (one at the top right, one at the bottom left). The third die shows 4 dots (two on the left, two on the right). The result is 10.

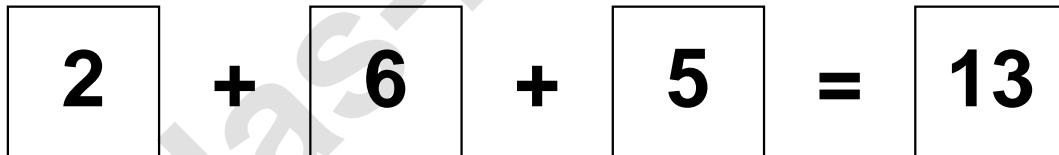

A numerical equation: 4 + 2 + 4 = 10.

Aufgabe 2.)

A visual equation using dice faces. The first die shows 2 dots (one at the top right, one at the bottom left). The second die shows 6 dots (two on the left, two on the right, two in the center). The third die shows 5 dots (two on the left, two on the right, one in the center). The result is 13.

A numerical equation: 2 + 6 + 5 = 13.
